

**Michele McDermott, M.D.,
C.C.D., N.C.M.P.**

is a board certified Endocrinologist who has focused on women’s mid-life health since joining The Austin Diagnostic Clinic in 1990.

Dr. McDermott provides specialty care for women seeking care and advice at the time of menopause. In 2000, she was among the first physicians in the United States to become a Credentialed Menopause Practitioner. She also specializes in the prevention and treatment of osteoporosis and is certified to interpret bone density scans.

Dr. McDermott graduated from Eastern Virginia Medical School and completed her Residency in Internal Medicine and Fellowship in Endocrinology at The University of Texas Health Science Center at Houston. As a principal investigator in clinical research trials, she has contributed to the development of several new treatments for menopause and osteoporosis. She regularly lectures on Hormone Therapy, Osteoporosis and other topics related to postmenopausal health. Dr. McDermott has been recognized for her contributions to health education of women in the Austin Community and has been selected by her peers as a “Texas Monthly Super Doctor” and recognized by her patients with the Patient’s Choice Award.

Dr. McDermott is a member of the North American Menopause Society, the International Society of Clinical Densitometry, the National Osteoporosis Foundation, the American Association of Clinical Endocrinologists, and the Society for Bone and Mineral Research.

The Menopause and Osteoporosis Center

at The Austin Diagnostic Clinic provides specialty care provided by physicians focusing on women’s hormone problems, symptoms related to menopause and prevention and treatment of osteoporosis.

Menopause consultations include a thorough assessment of personal and family health history and risk factors, physical examinations as well as education about the physiologic changes women may expect.

Treatment recommendations are based on individual needs and preferences .

Dr. McDermott and Dr. Gasal are Osteoporosis specialists who provide advice and consultation to patients and referring physicians throughout the central Texas area.
